## MICRODERMABRASION TREATMENTS

Our Microdermabrasion machine is state of the art and can combine **microdermabrasion** and **sonophoresis**.

Microdermabrasion is a non-surgical, safe and gentle procedure that deeply exfoliates and polishes the skin to stimulate new cell growth and renewal of collagen. Using a gentle vacuuming system and diamond tips, microdermabrasion removes dull, dead skin cells and unclogs pores. It is a non-invasive procedure that can be used to treat fine lines, wrinkles, acne, blackheads, congestion, pigmentation, open pores and age spots on the hands.

Sonophoresis is a relaxing, non-invasive treatment that uses ultrasonic (soundwave) technology. This warm, massaging treatment increases circulation, conditioning and toning the skin while infusing treatment products up to 800 times deeper into the skin. It is suitable for all skin types and delivers excellent results.

For maximum results a series of Microdermabrasion facials are recommended.
